

Algorithm configuration

Simpler

- Problems can still occur
 - Over-fitting
 - Heterogeneous instance sets
 - ...
- Detect → Report → Solve
 - Suggest solutions
 - Provide (partially) automated solutions?

Project in short

- Automatic algorithm configuration can be complicated → Sparkle makes it easier
- Detect issues that can still occur, like:
 - Over-fitting
 - Heterogeneous instance sets
- Suggest solutions to the user, perhaps automate them
- Supervision: Koen van der Blom, Holger Hoos
